## Array

Design Jesper Kongshaug and Refer + Staer

### Array - Contemporary Modular Lighting

Array is a minimalistic light with an aesthetic expression and complex uses.

Array consists of an angled base and eight pendants. LED lights are recessed in the pendant rods. The matt acrylic tubes provide a calm, diffused light whereas the down light generates a powerful focused beam. Latest LED technology provides a luminous intensity that meets today's requirements for effective, energy-friendly lighting.

Array works beautifully as a stand alone, single unit or can be linked together in more units to create a wealth of magnificent possibilities for creative formations. Array can be formed as a sculptural lighting element or as a room divider. The flexible and modular nature of Array makes the interaction between architecture and interior complete.

#### Materials:

Metal and acrylic.  
Silicone or fabric cable

LED light source : 8 x 2,5 Watt - 3000 Kelvin

#### Colours:

- Black finish
- White finish
- Purple finish

#### Size:

Base: 55 x 26 x 5 cm  
Total max length 250 cm

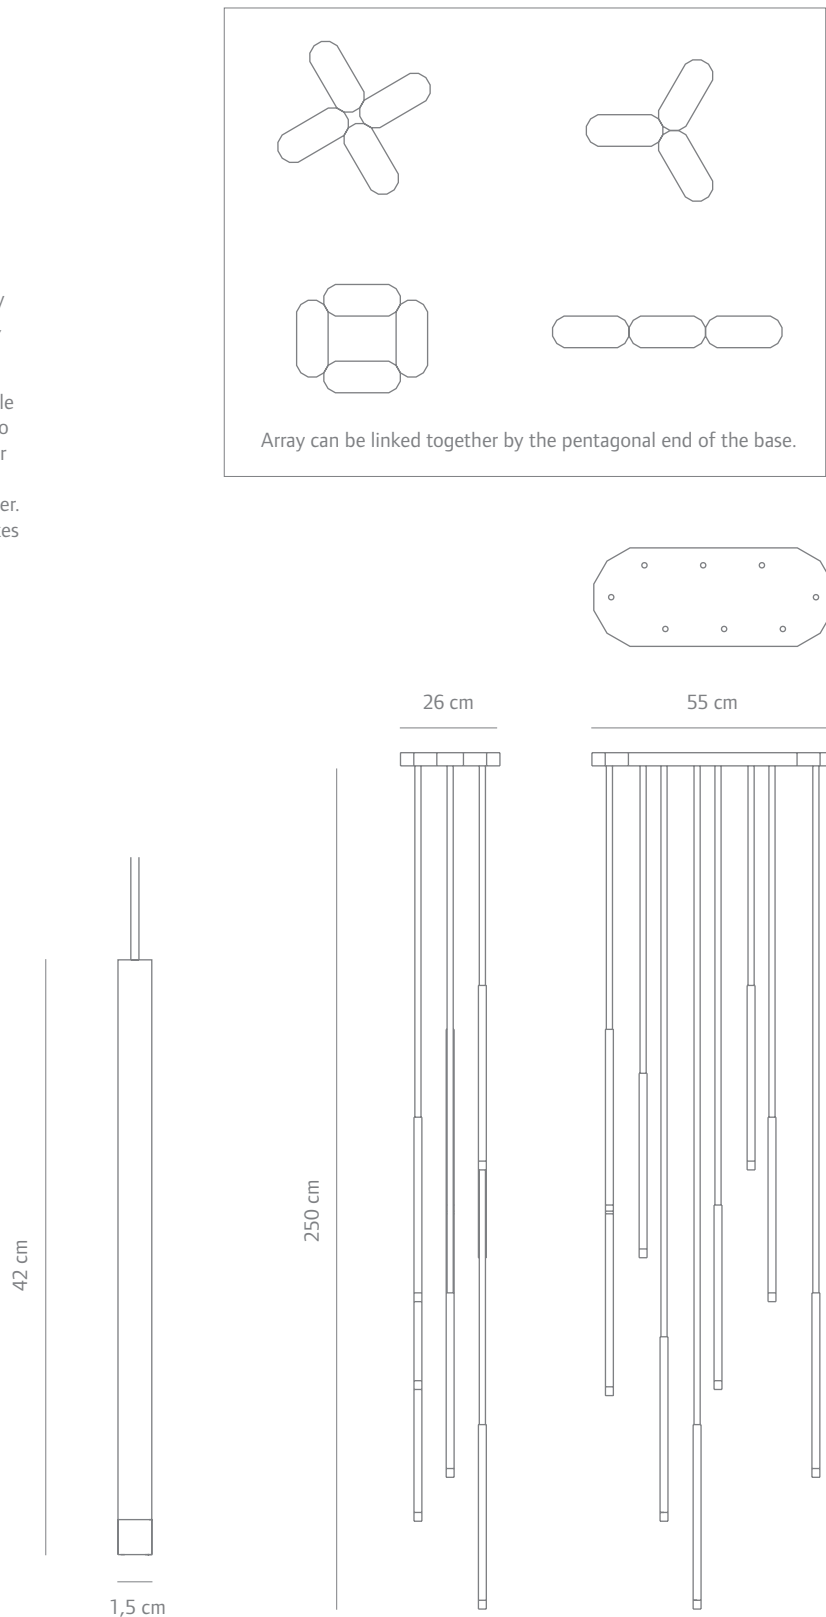

#### Mounting:

Fabric and silicone cable  
- length 250 cm

Extra length of cables are available on request.

Designed, produced and assembled in Denmark.

CE approved
